* Mechanics length black & gold bits. Shank has 3 flat sides for no-slip grip.

Our heavy duty drill bit will drill more holes and take more abuse than any other. No walk drilling, rugged construction. For faster drilling of tough material such as stainless and hi-alloy steels, the 135 degree split point and surface treatment increase wear resistance of the drill.

All Drill Bits are sold individually. Add a "P" at the end of the item number to order the package quantity listed.
EXAMPLE: DBHD10 = 1 bit
DBHD10P = 12 bits

REAMERS & DIES

REAMERS

SIZE	QTY	FINE THREAD
1/2	1	DBCPSA80M8
5/8	1	DBCPSA80M10
3/4	1	DBCPSA80M12
7/8	1	DBCPSA80M14
1"	1	DBCPSA80M16

These reamers make short work of enlarging holes in framework and structural steel. Multiple tapered cutting edges evenly distribute the cutting load for effortless reaming. Engineered exclusively to enlarge and align existing holes. Especially useful in tight spots. Industrial applications include steel erection, automotive, truck and trailer manufacturing and repair.

CUT OFF WHEELS

metabo[®]
work. don't play.

Professional quality in a wide variety of sizes, types and abrasive materials for the highest value.

SPECS: Aluminum Oxide (A) for general purpose processing of metals
Zirconia Alumina (ZA) for harder metals and longest life
Silicon Carbide (C) for non-ferrous metals, stone, concrete

The abrasive grain size determines the aggressiveness and finish

Lower numbers (16-24) offer aggressive metal removal.
Higher numbers (30-60) offer cooler grinding and finer finishes.

The hardness of the bond determines the useful life of the abrasive grain:
from A (softest) to Z (hardest)

EXAMPLE: A 30 S = A - General Purpose Aluminum Oxide Wheel for Ferrous Metals
30 - For Cooler Grinding and Finer Finish
S - A Hard Wheel for High Wheel Life
